

My Tasty Garden

A new concept for the ornamental crop grower

Matching the trend whereby the current garden lover produces their own kitchen products. These Fruit and vegetables can be harvested by you until the autumn.

Propagation happens in cooperation with the plants nursery Leo Ammerlaan BV. The knowledge and experience with young vegetable plants of this company is on the basis of My Tasty Garden. The plants are delivered on a 51-hole tray. These five cm plugs have the following advantages:

- **quick and easily potted,**
- **uniform growth**
- **short cultivation**

In addition, the plug is enriched with an effective Trichoderma strain, who also after potting the biological balance around the roots improves.
