BIENNIALS
2026-2027

Dear grower, dear partner,

You stand right next to it, and yet it remains a wonder: the germination of a seed.

Here in Woudrichem we create the right conditions: we sow, care and provide the proper climate – but the mystery of germination continues to amaze us time and again.

And growth afterwards? That too goes beyond our effort. In Woudrichem we take care of the young plant during the first weeks, and then you take over to turn it into a flowering plant. Together we witness how something small becomes something extraordinary: a plant that blossoms, brings beauty, and makes this world a better place to live.

That is what makes our profession so special. You and we, together, working for a blooming world. An ancient profession indeed – yet always full of meaning and future.

With this conviction we are proud to present to you our new catalogue: a source of inspiration, variety and quality. Let us prepare together for the season ahead.

With kind regards,

The team of Schneider Youngplants
